Sir:

RESPONSE UNDER 37 CFR 1.116

This is in response to the Office Action mailed October 22, 2002.

Claims 1 to 44 have been rejected and are presently pending.

In brief, the present invention is directed to a color
photothermographic film containing a thermal solvent for promoting development
in a dry or substantially dry process in the absence of thermal dye transfer, which
thermal solvent comprises a phenolic ring as represented by the claimed structure.

Favorable reconsideration of the application in view of the
following remarks is respectfully requested.

Rejection of Claims 1 to 44 under 35 U.S.C. 112:

Claims 1 to 44 have been rejected under 35 U.S.C. 112, first
paragraph, as containing subject matter which was not described in the
specification in such a way as to reasonably convey to one skilled in the art that
the inventors had possession of the claimed invention at the time the application
was filed. The Examiner states that the specification as originally filed fails to
provide support for the language "for promoting development in a dry or
substantially dry process in the absence of thermal dye transfer." The Examiner
refers to the following previous statements by Applicants:
